Greetings!

please find below news & updates from our association!

IBM+ (Innovative training and new Businessopportunities in the energy Market)

The third meeting of the Erasmus+ project IBM+ (Innovative training and new business opportunities in the energy market) was held in Trikala, Greece on the 30th - 31st May 2016. All partners were discussing and sharing new ideas about communication and dissemination and possible next steps.

The IBM+ project aims to select adapt, develop and facilitate the necessary knowledge, tools and methods to train energy sector agents in these of innovative techniques for the design and development of NEW BUSINESS MODELS within the energy sector. It aims to demonstrate how companies can act both proactively and with agility in order to be able to offer new products/services adapted to the market and system changes and the customer requirements.

Solar CV - SSA to coverskill needs throughdelivery and recognition of EU joint CV inConcentrated Solar Power

Solar CV is a project funded by European Commission under the Erasmus+ programme. It aims at increasing the response of Vocational Education Training (VET) systems by anticipating the Concentrating Solar Power (CSP) labour demand, integrating work-based learning (WBL) in the design of CSP VET and increasing mobility of EU CSP learners, by the recognition of learning outcomes and by achieving qualifications.

SOLAR CV (Curriculum & Validation) tools are designed considering ECVET and EQAVET European references, so the resulting products ensure a better understanding and comparability of

Co-funded by the
Erasmus+ Programme
of the European Union

qualifications across countries.
